

MULTISCALE REPRESENTATION OF OPEN SCIENCE PUBLICATION

Marie Farge

<marie.farge@ens.fr>
// opensciencia.ens.fr

Non peer-reviewed publications to translate the results of research to companies and citizens, under the responsibility of the market, as copyright as possible. The competition will be between researchers members of the editorial boards for accessing for free to the platforms.

Peer-reviewing publications under the responsibility of researchers who will develop new practices using peer-reviewing platforms, e.g., open peer-reviewing.

More objective

DISCIPLINES

Less objective

Publicly-owned peer-reviewing + publishing + archiving platforms, linked together, interoperable, developed in open source software, managed on the model of computer centers, to which private companies provide services without owning the infrastructures.
