List of corrections that must be made

Please attend to the items ticked

1. Consult a recent issue of JFS, to see what the required style and format have to be ☐
2. Indicate who is the corresponding author by an asterisk in the list of authors ☐
3. Submit a double-spaced manuscript
4. Do not give titles (e.g. Assoc. Professor, Ph.D. student or whatever) ☐
5. Add affiliation, immediately below list of authors; e.g. Department of ..., University ..., location, postal code, etc. ☐
6. Do not cite references in the Abstract ☐
7. Provide an Abstract at the very beginning of the paper ☐
8. Number the sections; e.g. "1. Introduction" ☐
9. Punctuate equations; i.e. add a comma, semicolon or period at the end of each equation ☒
10. All symbols, except list in item 10, should be typed in italics ☐
11. Re, St, KC and some such should be in Roman; all subscripts abbreviating words, such as "rel", "abs", "minor", "motor", "in", "out" should be in Roman; also "sin", "cos", "J" and "I" for Bessel functions, etc. AR in Roman ☒
12. Avoid having one-paragraph sections; use subsections instead, under a general heading for a section ☐
13. Use JFS style of citing references; e.g. "by Smith (1980)", "discovered (Smith, 980)"; in "Smith and Brown (1980)" etc. Consult a recent issue of JFS. ☐
14. Use JFS style of listing the references; this must be done precisely as needed. Common errors : to number the references instead of listing them alphabetically; to use quotation marks; to capitalize first letter of each word in titles of papers. Refer to journal web-site and a recent issue of the journal; journal titles in full. ☐
15. In the text (and figures), units, e.g. "m", "kg" etc., should be in Roman, as should be all numerical values ☐
16. The figures supplied should be at the end of the typescript, one figure per page ☐
17. Each figure should be of the correct size that would appear in the typeset paper ☐
18. The writing on each figure should be approximately the same as the size of the type used in JFS; if larger, the same size must be used in all figures, not huge letters in one and miniscule letters in another ☐
19. Preferably, symbols should be in italics in the figures too
20. Before the figures, there should be pages listing the figure captions, double-spaced also. Do not capitalize every word. ☐
21. You must cite, and include in the references, some JFS papers, including some published recently (in 2010 and 2011). ☒
